RESTORE-Wellness

Enriching well-being through engaging experiences, promoting physical, mental, and social wellness.

RESTORE.care

RESTORE.care

Optimizing restorative care processes for improved resident function and quality of life.

About Us

RESTORE's motion tracking and on-demand accessibility bring exciting possibilities to nursing home residents. With this innovative technology, residents can experience engaging games and activities on any laptop, tablet, or iPad in their facility. Adjustable to their individual abilities, residents have the power to control the games with their gestures and motions, creating interactive experiences that add a new level of fun and enjoyment to their skill-building journey.
